Emergency Management Assistance Compact (EMAC) resources in California

The Emergency Management Assistance Compact (EMAC) is the Nation's mutual-aid system that provides a formal structure where all 50 States and 4 Territories have the ability to share resources across State boundaries. The Cal OES EMAC Coordinator in coordination with the Cal OES Fire Branch are working together to request and coordinate needed resources via the EMAC Compact.

- The following states have EMAC resources in California:
 - Idaho: 5 engines
 - Montana: 5 engines
 - New Mexico: 5 engines
 - Washington: 15 engines
 - Utah: 9 engines

Northern California - Pre-positioned Resources

- An engine Task Force has been pre-positioned in the Tahoe Basin Area: CA-XTB-000001

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

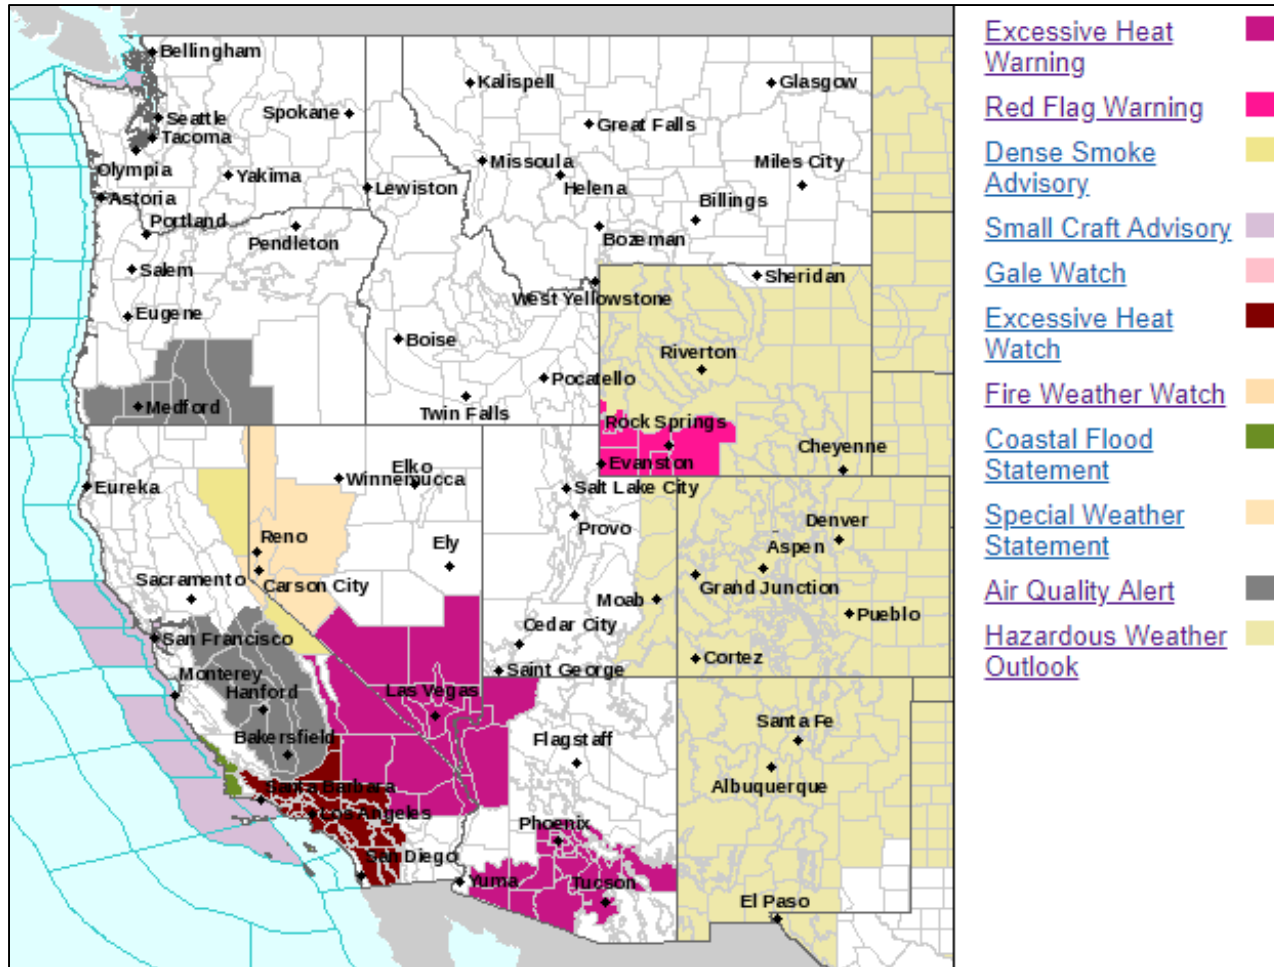

Dry weather is forecast to continue this week. Warm temperatures with locally breezy winds over higher terrain are expected today. While northwest winds are expected to weaken slightly from yesterday, winds will remain locally gusty in upper elevations through at least Tuesday near the Mendocino Complex and to a slightly lesser extent near the Carr Fire. This will maintain elevated fire weather conditions despite the slightly cooler temperatures and improved humidity. Warming temperatures and lowering humidity are expected to begin Tuesday and continue through the end of the week. A slight chance of dry thunderstorms exists Thursday and Friday; however, both probabilities and confidence are low in the forecast at this time. A warming trend with lighter, terrain-driven winds is expected for the rest of this week.

SOUTHERN CALIFORNIA

Very hot weather will return to Southwest California Sunday through Friday, the hottest temperatures are expected to occur on Tuesday into Wednesday when highs will be in the 90's for inland portions of the coastal plains, 100-110 in the valleys, and 95-105 for the lower mountain slopes. In addition, elevated to critical fire danger is present Sunday through Friday. Critical fire danger is likely for the Santa Barbara South Coast and the Ventura and Los Angeles County mountains, due to Sundowner winds through Tuesday. Elevated, brief critical fire weather conditions are forecast to exist elsewhere throughout the region, due to hot/dry conditions with gusty winds.
